Meet Our Leader

Ahmed Mohammed Badeeb

CEO/Founder

Ahmed Mohammed Saeed Badeeb is a prominent Saudi figure whose career spans public service, advisory roles, business, and cultural and historical interests. Born and raised in Jeddah, he is known for his interest in documenting the city's history and heritage, alongside a long career in senior governmental and advisory positions.

Key Milestones in His Career:

Government and advisory work: He held important government and advisory positions and was associated with sensitive political and security matters. He was also known for his advisory role during several pivotal periods.

Education and early career: He studied chemistry and began his professional life in education before moving into administrative and advisory work, later expanding into broader fields.

Cultural and historical interests: He is recognized for his interest in literature and local history, especially the documentation of old Jeddah and its Hejazi heritage, making him one of the names associated with preserving the city's cultural memory.

Business sector: He later became associated with Jehan Holding Group, a Jeddah-based holding company with more than 30 years of experience and a diversified presence across real estate, construction, manufacturing, hospitality, and healthcare. The group positions itself as focused on innovation and long-term value creation for its partners and stakeholders.

Meet The Team

Abdullah Badeeb

Deputy Executive Director

Abdullah Badeeb serves as the Deputy Executive Director of Jehan Holding Group, bringing strategic leadership and a deep commitment to operational excellence across the organisation.

Under his guidance, the company has expanded its production capabilities, strengthened its quality management systems, and achieved triple ISO certification — establishing Jehan as a trusted name in the Kingdom's construction sector.

With a hands-on approach rooted in integrity and precision, Abdullah continues to drive Jehan's mission of delivering reliable, high-quality concrete solutions across Western Saudi Arabia.

Who We Are

Jehan Ready Mix and Precast is a specialist manufacturer of high-quality concrete products, serving the Kingdom of Saudi Arabia since 1996. Operating out of Jeddah, we have spent nearly three decades building a reputation grounded in three principles: technical precision, material transparency, and reliable delivery.

Our integrated operations — dual batching plants, a fleet of 20 ready-mix trucks, and five specialised pump units — enable us to serve projects of any scale, from individual homebuilders to major national infrastructure contractors. Every order is backed by our triple ISO certification: ISO 9001 (Quality), ISO 14001 (Environment), and ISO 45001 (Health & Safety).

Jehan is not just a concrete supplier. We are a technical partner — available from specification through to final pour.

What We Stand For

MISSION

To manufacture and deliver superior-quality ready-mix and precast products that enable our clients to build with confidence. Committed to precision in every batch, transparency in every transaction, and excellence in every delivery — supporting contractors and developers across Saudi Arabia.

VISION

To become the leading concrete manufacturer in the Western Region — recognised for the strength of our products and the integrity of our relationships. We envision Jehan as synonymous with quality construction materials, contributing meaningfully to Saudi Vision 2030.

VALUES

Integrity — We do what is right, always.

Transparency — Honest with every client.

Quality — No compromise on materials.

Accountability — We own our outcomes.

Community — Supporting local employment.

Innovation — Continuous improvement.

Our Story

Founded in 1996 in Jeddah, Jehan Ready Mix and Precast has spent nearly three decades becoming one of the Western Region's most trusted concrete manufacturers.

From our origins as a regional ready-mix supplier, we have expanded into precast concrete, specialist infrastructure elements, and—soon—structural building blocks. Our client base spans private homebuilders, commercial developers, and major infrastructure contractors working on projects aligned with Saudi Vision 2030.

Our market reputation rests on three pillars: consistent product quality, honest material specifications, and reliable delivery—values unchanged since our founding and reinforced today by our triple ISO certification.

Specialisation	Ready-Mix Concrete · Precast Concrete · Building Blocks
Certifications	ISO 9001:2015 · ISO 14001:2015 · ISO 45001:2018
Key Contact	Abdullah Badeeb — Deputy Executive Director

What We Offer

01 READY-MIX

Ready-Mix Concrete

- High-strength 50–60 MPa mixes
- Sulphate-resistant formulations
- Water-reducing / retarding mixes
- Base rate SAR 190 / m³
it depends on grade mix

02 PRECAST

Precast Concrete

- Walls, slabs, beams, columns
- Drainage channels & box culverts
- Bridge components & road barriers
- Custom design to specification

03 BLOCKS

Building Blocks

- Standard structural concrete blocks
- Launching soon
- Suitable for all project types
- Manufactured to Saudi standards

Our Differentiators

01

Mix Transparency

We share full mix specifications with every client — no hidden substitutions, no inflated grades.

02

Dual-Plant Flexibility

Dry-mix and wet-mix plants operating simultaneously to service multiple contracts without delay.

03

Engineering Consultation

Civil engineers provide pre-project technical advice to select the right mix for your site — at no extra cost.

04

30 Years Local Expertise

Decisions made locally in Jeddah by people who know the Western Region's conditions.

05

Triple ISO Certification

ISO 9001, 14001, and 45001 — quality, environment, and safety in every step.

06

Direct Client Access

You speak directly to the project team from first enquiry through final pour.

Internationally Certified — Triple ISO

Issued by SISTEMA Certifications — IAF/IAS Accredited (MSCB-215)

ISO 9001:2015

Quality Management System

SISTEMA-KSA/JHG-Q20307

Guarantees all manufacturing and delivery operations meet rigorous quality controls — from mix design to final pour.

ISO 14001:2015

Environment Management System

SISTEMA-KSA/JHG-E20308

Reflects our commitment to minimising environmental impact across operations — aligned with Vision 2030 and major project procurement requirements.

ISO 45001:2018

Occupational Health & Safety

SISTEMA-KSA/JHG-O20309

Ensures our facility operations and field activities meet the highest health and safety standards, protecting all personnel.

Building the Kingdom's Future

Saudi Vision 2030 is reshaping the construction landscape of the Kingdom — and Jehan Ready Mix and Precast is positioned to be a key supplier in that transformation.

As a Jeddah-based manufacturer with nearly three decades in the Western Region, our operations, values, and community presence directly support the Vision's key pillars.

01

National Infrastructure

Documented record of concrete supply for road, bridge, and drainage projects — precisely Vision 2030's priority sectors.

02

Environmental Sustainability

ISO 14001 translates environmental commitment into verifiable practice — qualifying Jehan for sustainability-mandated projects.

03

Localisation & Workforce

72 employees in Jeddah contributing directly to Saudisation targets and Western Region economic development.

04

Housing & Urban Development

Vision 2030's accelerated housing targets drive growing demand for ready-mix — our products serve all buyer segments.

Integrated Production Capability

20

Mixing Trucks

A full fleet of ready-mix transit mixers ensuring timely, consistent delivery — from small residential pours to large infrastructure contracts.

5

Concrete Pumps

Specialised pump units for delivering concrete to hard-to-reach locations and elevated positions on complex project sites.

2

Batching Plants

One dry-mix and one wet-mix plant — dual-plant capacity provides flexibility, redundancy, and the ability to service multiple concurrent contracts.

How We Operate

01

Ready-Mix Concrete Division

Our flagship division — batching and delivering ready-mix concrete to site under ISO 9001 quality protocols, ensuring correct mix ratios for every project specification.

02

Precast Concrete Division

Manufactures structural concrete elements in the factory — walls, beams, slabs, drainage systems, and infrastructure elements from precision engineering drawings.

03

Carpentry Shop Division

Structural and architectural carpentry for projects and buildings. Also produces the timber formwork used in precast concrete manufacturing operations.

04

Aluminum Workshop Division

Fabrication and installation of aluminium structural systems and façade elements, including framing, cladding, and architectural finishes.
